Guidelines for Authors

www.rbri.co.uk/journal/authors/author1.html

1. Submission of manuscripts

Manuscripts must be submitted in English and must be original, unpublished work not under consideration for publication elsewhere. First copies of the manuscript together with all illustrations and tables should be submitted along with a complete version on CD to the Editor: Richard Lorch, 43 Saint George’s Avenue, London N7 9LG, UK. PDF and LaTeX files are not acceptable. We cannot accept submissions of manuscripts by e-mail. It will be assumed that authors will keep a copy of their manuscripts. Manuscripts and files are not retuned to the author. Note to authors: Please make sure your contact address information is clearly visible on the outside of all packages you are sending to the editor. The manuscript will be refereed by acknowledged experts. Revisions may be required before a decision is made to accept or reject the paper. If an author is uncertain about whether a paper is suitable for publication in the Journal, it is acceptable to submit a synopsis first.

2. Effective communication

The paper should be written in a style that is concise and easily understood. Inaccurate or misspelled words or structures, or a word-written introduction will help achieve this. Single language, short sentences and a good use of headings will all contribute to improving the information structure. Discussion of the subject matter should be discussed. Figures should be used to aid the clarity of the paper. The reader should be sufficiently guided through the paper. Think about your reader. The text should be improved, written in the third person. Although there are no length limitations, research papers should fall within the range of 3500–7000 words.

3. Preparation of the manuscript

3.1 Layout

The discussion should emphasize the implications and practical applications of the ideas, and should be accompanied by practical suggestions. It should be no more than 250 words. All manuscripts must be prepared in double spaced (12-point) text. A separate sheet with a sequential list of all illustrations and their captions must be submitted. A limited number of explanatory notes is permissible. These notes should be inserted on a separate sheet of paper, not under consideration for publication elsewhere. Four copies of the manuscript together with all illustrations and tables should be submitted along with a complete version on CD to the Editor: Richard Lorch, 43 Saint George’s Avenue, London N7 9LG, UK. PDF and LaTeX files are not acceptable. We cannot accept submissions of manuscripts by e-mail. It will be assumed that authors will keep a copy of their manuscripts. Manuscripts and files are not retuned to the author. Note to authors: Please make sure your contact address information is clearly visible on the outside of all packages you are sending to the editor. The manuscript will be refereed by acknowledged experts. Revisions may be required before a decision is made to accept or reject the paper. If an author is uncertain about whether a paper is suitable for publication in the Journal, it is acceptable to submit a synopsis first.

3.2 Figure (page 2): The page of the figures should contain a concise and informative title, the names, affiliations and addresses (including department and university) of all authors, and clearly identify the corresponding author (who will be responsible for correspondence and correcting proofs).

3.3 Abstract and keywords (page 2)

An abstract of not more than 200 words should be included at the end of the manuscript. The abstract must be self-contained and provide a concise and informative summary of the manuscript.

3.4 Introduction (page 2)

The introduction should clearly state the purpose and objectives of the paper. It should include key references to appropriate work, but is NOT the place for a comprehensive critical or historical review.

3.5 Discussion

The discussion should emphasize the implications and practical applications of the ideas, and should be accompanied by practical suggestions. It should be no more than 250 words. All manuscripts must be prepared in double spaced (12-point) text. A separate sheet with a sequential list of all illustrations and their captions must be submitted. A limited number of explanatory notes is permissible. These notes should be inserted on a separate sheet of paper, not under consideration for publication elsewhere. Four copies of the manuscript together with all illustrations and tables should be submitted along with a complete version on CD to the Editor: Richard Lorch, 43 Saint George’s Avenue, London N7 9LG, UK. PDF and LaTeX files are not acceptable. We cannot accept submissions of manuscripts by e-mail. It will be assumed that authors will keep a copy of their manuscripts. Manuscripts and files are not retuned to the author. Note to authors: Please make sure your contact address information is clearly visible on the outside of all packages you are sending to the editor. The manuscript will be refereed by acknowledged experts. Revisions may be required before a decision is made to accept or reject the paper. If an author is uncertain about whether a paper is suitable for publication in the Journal, it is acceptable to submit a synopsis first.

3.6 Acknowledgements (page 2)

A concise and informative title; the names, affiliations and addresses (including department and university) of all authors, and clearly identify the corresponding author (who will be responsible for correspondence and correcting proofs).

3.7 Endnotes

Endnotes should be numbered sequentially with superscript Arabic numerals at the point of reference. Endnotes should be separated from the body of the text by a line of dots and clearly identified by a key in the figure legend rather than in the figure itself. Similarly, internal scales, measuring or processing of the figure must be explained where appropriate.

3.8 Symbols, abbreviations and conventions (page 2)

Abbreviations and conventions in papers must follow the recommendations of the International Organization for Standardization (ISO). The first time a term is used, it should be defined in full. Authors must ensure that the term is explained where appropriate.

3.9 Tables

Tables should be numbered sequentially and clearly identified by a key in the figure legend. They should be typed on a separate sheet of paper and clearly identified by a key in the figure legend.

3.10 Figures

Each figure must be typed, double spaced on a page. They must be numbered sequentially with Arabic numerals, and a concise informative title should clearly state the purpose and objectives of the figure. A separate sheet with a sequential list of all illustrations and their captions must be submitted. A limited number of explanatory notes is permissible. These notes should be inserted on a separate sheet of paper, not under consideration for publication elsewhere. Four copies of the manuscript together with all illustrations and tables should be submitted along with a complete version on CD to the Editor: Richard Lorch, 43 Saint George’s Avenue, London N7 9LG, UK. PDF and LaTeX files are not acceptable. We cannot accept submissions of manuscripts by e-mail. It will be assumed that authors will keep a copy of their manuscripts. Manuscripts and files are not retuned to the author. Note to authors: Please make sure your contact address information is clearly visible on the outside of all packages you are sending to the editor. The manuscript will be refereed by acknowledged experts. Revisions may be required before a decision is made to accept or reject the paper. If an author is uncertain about whether a paper is suitable for publication in the Journal, it is acceptable to submit a synopsis first.

4. Proofs

Proofs will be sent to the designated corresponding author and should be returned directly to the publisher within 6 working days of receipt. Alterations in proofs other than correction of the typesetter’s errors may cause delay and incur costs that will be charged to the author(s). Please note that proofreading is the sole responsibility of the author.

5. Free online access

Submissions will be made in online access to their article through our website (www.technologyweb.co.uk) and a corresponding print publication with all containing their articles. Reprints of published articles in this journal can be purchased from the journal’s publisher, E & FN Spon, Stone, P.A. (1980) Building Design Evaluative Cost-estimation, E & FN Spon, London. Barrett, S. (1998) Implementation of public policy, in S. Barrett and C. Tindale (eds), Policy and Action in EU Support Schemes, Kluwer, London, pp. 1–53. If you or your sponsor is aware of the author’s study being funded for your research, you should be made aware of the requirements you need to check the accuracy of references. References in the text should be quoted in the following manner: Smith (1975) or (Brown and Green, 1976) and if there are more than two authors then the year should be specified. Please make sure your contact address information is clearly visible on the outside of all packages you are sending to the editor. The manuscript will be refereed by acknowledged experts. Revisions may be required before a decision is made to accept or reject the paper. If an author is uncertain about whether a paper is suitable for publication in the Journal, it is acceptable to submit a synopsis first.

6. Copyright

It is a condition of publications that authors assign copyright or license the publication rights in their article, including abstracts, to Taylor & Francis Ltd. Authors must ensure that the term is explained where appropriate.

Note to authors: Please contact your reprints department at reprints@tandf.co.uk.
